

# Music at Your Fingertips!

## Mechanical Rights/Royalty & Copy Right Protection Position Statement

Aqwertian Music Systems respects and will comply with all existing mechanical rights licensing/royalty and copyright laws protecting all parties involved in the music industry from original artists and publishers through distribution to the end consumers. Both traditional and emerging legal music industry avenues for the creation, publishing, distribution, and sale to entities and individuals at all levels of the music industry supply chain will be honored and respected.

Aqwertian Music Systems is a music performance application software company. We offer a tool box (applications for performance, applications for music file conversion, and new music hardware instruments and devices) for a new music performance capability to augment the burgeoning 'Music Rhythm' genre of 'games'. Our most visible product is a music performance application called 'Music at Your Fingertips!'.

'Music at Your Fingertips!' makes it instantly possible for hundreds of millions of people world-wide, already adept at 'playing' the qwerty keyboard to now 'play' music enjoyably within minutes. If you can type you can play!

Aqwertian Music Systems believes that these tools will create a vast new market for musicians, music publishers, and other music supply chain players at all levels. This new market will be similar to Karaoke, Ring Tones, Music on Hand Held Devices, Game Music, and now the Guitar Hero and Rock Band industries.

Aqwertian Music Systems looks forward to working lawfully and profitably with both traditional and newly emerging Music Industry constituents at all levels!
